LENOX MANGI

Software Developer

SUMMARY

Highly creative and detail-oriented software developer with a profound passion for Web3 technologies. Demonstrated expertise in designing and deploying successful front-end and back-end web applications.

Eager to contribute my skills and experience to a forward-thinking tech company with a global presence, where I can continue to drive innovation and make a significant impact in the world of emerging technologies.

WORK EXPERIENCE

Remote Software Developer at 100Devs, Nairobi, Kenya

February 2022 – Present

- Collaborated with a team of developers to design and develop modern and responsive web applications, using best practices.
- Built semantically structured, full-stack web applications.
- Applied agile methodologies like SCRUM for project management

Recent Projects:

TrackSquadron (Fullstack Web App) - Designed and built a web application specifically for athletes and cyclists. Users can create, monitor, and share their workout routes. Notably, implemented a robust data persistence feature, guaranteeing that workout data remains intact even after refreshing the web page. This guarantees an uninterrupted user experience.

FoodieFinder (Fullstack Web App) - Designed and developed a user-friendly web application that allows users to search for diverse food items and access comprehensive recipes instantly. Additionally, integrated a feature that enables users to bookmark their favorite recipes for easy access and personalized cooking experiences.

Freelance Software Developer

March 2021 – Present

- Built full stack web applications for different clients across small and medium size businesses, like restaurant websites, school websites etc.
